En réponse à @GustavNilssonne

The model was trained on data from the treatment arm of the EMBARC study. Next, they tested the model on data from the placebo arm. Finding that the model did not predict improvement, they argued that this suggests the predicted effect is specific to SSRI. (2/x)

🗨️ 2

🔄 4

❤️ 13

Gustav Nilssonne @GustavNilssonne · 17 févr.

But an alternative explanation is that the model predictions did not generalize well due to overfitting on the training dataset. Luckily, they also tested the "antidepressant-predictive signature" in a second independent sample. But wait! The variables are switched around. (3/x)

🗨️ 1

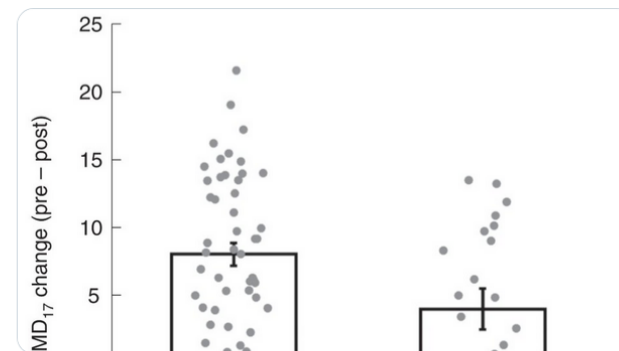

🔄 2

❤️ 23

Gustav Nilssonne @GustavNilssonne · 17 févr.

Instead of using the model to predict patient status, they used patient status to predict the model predictions. (4/x)

🗨️ 2

🔄 4

❤️ 19

Gustav Nilssonne @GustavNilssonne · 17 févr.

So I grabbed their data and tested how well the model predicted patient outcome, compared to 1000 bootstraps with labels switched randomly. Result: no better than chance. (5/x)

European Psychiatry turns open access

European Psychiatry
@EP_Editors

Attention authors - we're going Gold! Any articles submitted from this point will be considered for our 2020 volume; accepted articles will be published open access. For more information please see our new homepage: bit.ly/349NHak @CambUP_Psych @CambridgeCore

CONVERTING
TO OPEN
ACCESS IN
JANUARY 2020

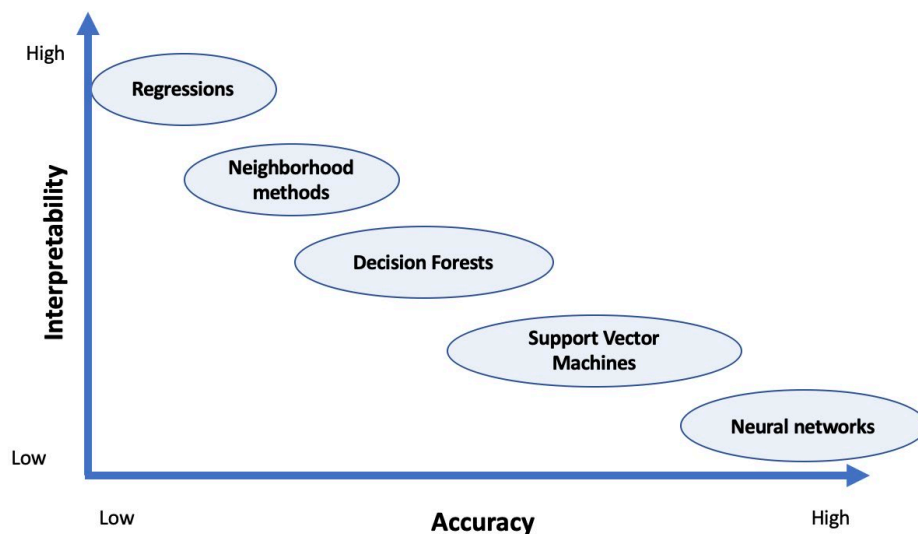

European Psychiatry ask to share data

How to share resources

European Psychiatry encourages the sharing of resources through repositories that make content as Findable, Accessible, Interoperable and Reusable (FAIR) as possible. Wherever possible, authors are encouraged to use repositories that:

- Are committed to the long-term preservation and accessibility of their content.
- Are supported and recognised by the community as appropriate for the resources they hold.
- Provide stable, unique identifiers for the information they hold.
- Support linking between their database records and associated published research articles.
- Allow free public access to their holdings, with reasonable exceptions (such as administration charges for the distribution of physical materials).

Psychiatry data can be analysed with a lot of different methods

Goals of the workshop

- Understand the challenges of open science
- Learn the names of few tools
- Consider you own research/projects
- Rate cakes

Principles

Problems

- **Cost:** How much will it cost to run this study?
- **Method:** What do they mean when they did this analysis?
- **Licence:** Does someone has the last version of this software ?
- **Memory:** where is my data, how to re-use, share it?
- **Paywall:** I can't get this article
- **Visibility:** Nobody cares about what we did

Publication lucrative vicious circle

How the life of publishers changed

**#DATA
#GUEULE**

63

$E=mc^2?$

CA 7 600 000 000 000 £ / AN

PRIVES DE SAVOIR ?

Goals

- Decrease costs
- Improve transparency
- Improve accessibility to software, articles, and re-use of data
- Improve visibility for public and increase citations
- Is that really possible ?!?

Why is there a need for open science?

nature
human behaviour

PERSPECTIVE

PUBLISHED: 10 JANUARY 2017 | VOLUME: 1 | ARTICLE NUMBER: 0021

OPEN

A manifesto for reproducible science

Marcus R. Munafò^{1,2*}, Brian A. Nosek^{3,4}, Dorothy V. M. Bishop⁵, Katherine S. Button⁶, Christopher D. Chambers⁷, Nathalie Percie du Sert⁸, Uri Simonsohn⁹, Eric-Jan Wagenmakers¹⁰, Jennifer J. Ware¹¹ and John P. A. Ioannidis^{12,13,14}

Data from many fields suggests reproducibility is lower than is desirable^{8–14}; one analysis estimates that 85% of biomedical research efforts are wasted¹⁴, while 90% of respondents to a recent survey in *Nature* agreed that there is a ‘reproducibility crisis’¹⁵.

Information world

- Share of information don't decrease the ownership of the sharer
- Rather, better accessibility improve possibilities of not anticipated use (hacking) and feedback
- Open softwares are more flexible and have fewer bugs that closed one (servers, cryptography algorithms)

Free / Open?

Open software: Free use, study, modification,
duplication and sharing
≠ Freemium strategy (demonstration)
≠ centralisation and user data collection

An example of Open science pathway

Hands-on

Research protocol

- Make a data base of cookies tasting
- Rate them in an international context
- Select the best cakes in the worlds

Sampling process during EPA congress, Madrid, 2016

Publication School (2-day workshop) The secrets of success in writing and publishing research articles

Do you want to get your health research published, and be praised for it?
Do you want your institution to be recognised for its excellent publication record?
Do you want to make a real difference with your research?

Then, this is the course for you!
A large number of published health research articles are reported badly. They provide insufficient, misleading or ambiguous information, and cannot be used to inform future research or improve healthcare for patients. It doesn't have to be this way.

Join us this summer for an intensive, practical course in the heart of the beautiful Gold Coast - and learn how to write a publishable research article in less than 48 hours!

EQUATOR's flagship Publication School aims to develop essential writing skills to help you achieve success in planning, writing, publishing and communicating research through traditional journals and other channels.

Course tutors include:
Prof Paul Glasziou, An Prof Elaine Beller (Bond University), and Dr David Moher (Canadian EQUATOR Centre)

[equator network](#) [CREP](#) [BOND UNIVERSITY](#) [HEALTH RESEARCH](#)

LEARNING OUTCOMES

Hands-on writing exercises for key sections of a research article

Using reporting guidelines such as CONSORT and STROBE to optimise the usability of your research

Finding the perfect journal and navigating editorial systems

Giving and receiving constructive peer review

For more details of the course and how to register, see [www.equator.net.au](#) or contact [marcme@bond.edu.au](#)

Abstract

Your abstract.

1 Introduction

Your introduction goes here! Some examples of commonly used commands and features are listed below, to help you get started. If you have a question, please use the help menu ("?) on the top bar to search for help or ask us a question.

2 Some examples to get started

2.1 How to add Comments

Comments can be added to your project by clicking on the comment icon in the toolbar above. To reply to a comment, simply click the reply button in the lower right corner of the comment, and you can close them when you're done.

2.2 How to include Figures

First you have to upload the image file from your computer using the upload link the project menu. Then use the includegraphics command to include it in your document. Use the figure environment and the caption command to add a number and a caption to your figure. See the code for Figure 1 in this section for an example.

2.3 How to add Tables

Use the table and tabular commands for basic tables — see Table 1, for example.

Figure 1: This frog was uploaded via the project menu.

Framapad

Collaborating online has never been easier

The screenshot shows the Framapad web interface. At the top is a toolbar with various editing tools like bold, italic, underline, and text color. Below the toolbar is a text area with a list of lines on the left. The text is a story about Nasreddin and a pomegranate tree. To the right of the text area is a list of participants: 'Entrez votre', 'Oscar', and 'Yuma'. At the bottom right is a chat window with a header 'Chat' and a list of messages from 'Matéo' and 'Maya'.

Nasreddin et le pommier

1 Nasreddin plantait un pommier dans son jardin quand le sultan vint à passer ;
 2 il s'arrêta et dit à Nasreddin, d'un ton moqueur :
 3
 4 – Voyons, Nasreddin ! Pourquoi te donnes-tu tant de peine ? Tu ne mangeras jamais les fruits de ce pommier.
 5 Tu sais bien que tu mourras avant qu'il ne commence à produire des pommes.
 6
 7 Ce à quoi Nasreddin répondit :
 8
 9 – Oh Sultan ! Nous mangeons les fruits des pommiers plantés par nos pères, et nos enfants mangeront les fruits
 10 des pommiers plantés par nous.
 11
 12 Cette réponse pleine de sagesse plut au sultan qui, en récompense, donna une pièce d'or à Nasreddin.
 13
 14 – Oh Sultan ! , dit Nasreddin en empochant la pièce, voyez comme ce pommier a déjà donné des fruits.
 15
 16 Cette remarque fit rire le sultan, qui lui donna une autre pièce d'or.
 17
 18 – C'est de plus en plus extraordinaire, s'écria Nasreddin. Voilà un pommier qui donne deux récoltes par an.
 19
 20 Le sultan se mit à rire aux éclats et donna une troisième pièce d'or à Nasreddin.
 21

About IACAPAP ArXiv

"IACAPAP ArXiv" is a facility that gives child and adolescent mental health professionals the opportunity to upload clinical or research documents in their own language (with an abstract in English). These documents are then freely available to all internet users. The quality of the articles is assured by formal approval by the national child and adolescent mental health organization to which the authors belong, or by IACAPAP if the national organization does not exist or does not participate to the ArXiv.

Badges

Figure 2 | The impact of introducing badges for data sharing. In January 2014, the journal *Psychological Science* (PSCI) introduced badges for articles with open data. Immediately afterwards, the proportion of articles with open data increased steeply, and by October 2015, 38% of articles in *Psychological Science* had open data. For comparison journals (*Clinical Psychological Science* (CPS), *Developmental Psychology* (DP), *Journal of Experimental Psychology: Learning, Memory and Cognition* (JEPLMC) and *Journal of Personality and Social Psychology* (JPSP)) the proportion of articles with open data remained uniformly low. Figure adapted from ref. 75, PLoS.

Biscuit

From Wikipedia, the free encyclopedia

See also: [Biscuit \(bread\)](#) and [Cookie](#)
For other uses, see [Biscuit \(disambiguation\)](#).

This article **may lack focus or may be about more than one topic**. Please help improve this article, possibly by [splitting](#) the article and/or by introducing a [disambiguation page](#), or discuss this issue on the [talk page](#). *(May 2016)*

Biscuit is a term used for a diverse variety of [baked](#), commonly [flour-based](#) food products. The term is applied to two distinct products in [North America](#) and the [Commonwealth of Nations](#) and [Europe](#). The North American biscuit is typically a soft, leavened [quick bread](#), and is covered in the article [Biscuit \(bread\)](#). This article covers the other type of biscuit, which is typically hard, flat and unleavened.

Biscuit

From Wikipedia, the free encyclopedia

See also: [Biscuit \(bread\)](#) and [Cookie](#)
For other uses, see [Biscuit \(disambiguation\)](#).

This article **may lack focus or may be about more than one topic**. Please help improve this article, possibly by [splitting](#) the article and/or by introducing a [disambiguation page](#), or discuss this issue on the [talk page](#). *(May 2016)*

Biscuit is a term used for a diverse variety of [baked](#), commonly [flour-based](#) food products. The term is applied to two distinct products in [North America](#) and the [Commonwealth of Nations](#) and [Europe](#). The North American biscuit is typically a soft, leavened [quick bread](#), and is covered in the article [Biscuit \(bread\)](#). This article covers the other type of biscuit, which is typically hard, flat and unleavened.

Meet WordPress

WordPress is open source software you can use to create a beautiful website, blog, or app.

WordPress dashboard interface showing the "Add a New Post" screen. The dashboard includes a sidebar with navigation links (Dashboard, Jetpack, Posts, Media, Pages, Comments, Events, Feedback) and a main content area for creating a new post. The post editor shows a title field, a rich text editor with various formatting options (bold, italic, link, quote, del, ins, image, list, link, code, more), and a publish sidebar with options like "Save Draft", "Preview", "Status: Draft", "Visibility: Public", and "Publish immediately". A notification banner at the top of the post editor states: "Wordfence could not get an API key from the Wordfence scanning servers when it activated. You can try to fix this by going to the Wordfence "options" page and hitting "Save Changes". This will cause Wordfence to retry fetching an API key for you. If you keep seeing this error it usually means your WordPress server can't connect to our scanning servers. You can try asking your WordPress host to allow your WordPress server to connect to noc1.wordfence.com."

Make the knowledge
more visible

Dear Dr. Gargot,

Allow me to respond in place of Adam, as your request touches some association-specific issues.

While we do appreciate the logic of making a course on open science accessible to all, I'm sure you can understand that as EPA Courses require a fee for attendance, it may seem slightly unfair to paying participants to provide these course materials to all delegates.

However, perhaps a compromise could be to make the slides freely available within the ECP-themed pages of the EPA website *after* the congress?

Best regards,

Meaghan Dreyer
