

Prof. Davy Vancampfort **Biography**

Prof. Davy Vancampfort is a physiotherapist by background (KU Leuven, 2003), specialized in mental health rehabilitation. He obtained his PhD on the topic of metabolic co-morbidities in people with severe mental illness (KU Leuven, 2012). From 2013-2019, he was postdoc at the Department of Rehabilitation Sciences. From 2019, he is assistant professor and the mental health rehabilitation research lead at the department where he steers several research lines, mainly focusing on the role of exercise in stress- and trauma-related disorders. Part of his research is executed in Uganda. Prof. Vancampfort is a highly prolific researcher in psychology and psychiatry (Clarivate Analytics 2018 to present). Personal and grant funding for his research team comes from departmental, KU Leuven internal, Research Fund Flanders (FWO), EU and international funds.
