WELCOME LETTER

Dear Colleagues,

The 19th European Congress of Psychiatry takes place at the International Congress Centre of Vienna, Austria from 12-15 March 2011.

It is our pleasure to welcome you to Vienna. As we have tried to make a tradition, the cities we visit for the European Congress of Psychiatry have a special relationship or history connected with psychiatry. Vienna is no exception with names such as Julius Wagner-Jauregg, Sigmund Freud, Viktor Frankl, and Alfred Adler.

EPA offers you a high-quality, multidisciplinary scientific programme that will provide a full review of the most important aspects of diagnosis and treatment in psychiatry and latest achievements in this field.

Under the motto “Translating Research into Care”, as a tribute to the EPA inner mission in Europe, the Congress highlights include presentations by outstanding European and international experts in Psychiatry.

The scientific programme is composed of plenary lectures, core symposia, pro and con debates, state of the art sessions, accepted symposia, workshops, free communications, posters, a dedicated early career psychiatrists’ programme, CME Academia courses and symposia organised by the leading pharmaceutical companies.

We have developed an array of activities that will allow participants the opportunity to interact and network with colleagues from Europe and around the world.

We welcome you to the beautiful city of Vienna!

EPA Goes Green

Green Society

The European Psychiatric Association is dedicated to taking personal and active responsibility for our effect on the environment. EPA is committed to integrating new practices in its head office, congresses and promotional activities that will reflect our ethos for change and eco-conscience.

We believe that as a continental society EPA has a voice and a responsibility not only to act but also to spread the message to our members and colleagues.

Green Meeting

EPA and appointed congress organiser Kenes International are devoted to considering environmentally-friendly practice at the European Congress of Psychiatry and in all of our operations. Our responsibility to our Congress participants, staff, environment and society is paramount in all of our decisions, policies and practices. At present, here are a few of the practices we have undertaken of EPA 2011:

- Our print materials are printed on recycled or PEFC approved paper
- Reduced plastic registration envelopes
- Name tags can be deposited when participants leave the meeting for re-use.
- Abstracts are published on an Abstract CD-ROM with the option to print selected abstracts at the Abstract Printing area.
- At the Congress we will recycle plastic, glass, cans and paper.
- Environmentally conscious offices (amongst other things, we recycle our waste, including organic waste for compost, integrated energy saving fixtures throughout the building and use only recycled paper).

Green Participants

Offset your Carbon Footprint - You can contribute to our ecological efforts by offsetting the Carbon Footprint of your travels to EPA 2011. A Carbon Offset represents a reduction in emissions somewhere else - like a wind farm in Texas or a reforestation project in Nicaragua - to balance out the emissions you cannot reduce.

You can learn more and offset your carbon footprint at: www.carbonfund.org

CHANCE 2 MEET

Chance 2 Meet is an interactive online networking platform meant to enhance and encourage Congress attendees to set up pre-scheduled meetings at the Congress with their peers and colleagues in a defined timeframe.

This online system manages meetings' logistics, including the allocation of time slots and tables for the meetings at the designated EPA Chance 2 Meet Area on Sunday, 13 March and Monday, 14 March.

You can also approach our hostess at the Chance 2 Meet area and schedule a meeting onsite.

The EPA Chance 2 Meet Area is located in the exhibition area.

We welcome all Congress participants to use this as a meeting point, whether you have pre-booked space using our online networking tool or wish to book meetings onsite.

E-POSTER ARCHIVE

EPA is pleased to introduce this presentation tool in Vienna for the first time to highlight the outstanding posters.

Participants and members will be granted access to an advanced e-Poster platform. This system provides user-friendly access to a large number of selected posters online – before, during and after the Congress.

The e-Poster Archive allows users to browse by poster sections, and features educational tools, such as searching for specific content, being able to comment on posters and ask questions to the authors. Some posters will be available for download in PDF format when permitted by the authors.

Approximately 120 abstracts have been selected for e-Poster Presentations.

Those abstracts selected for e-Poster Presentations will be presented both as a standard poster, as well as in an electronic presentation of about 4 minutes, including 2-3 slides to present the poster.

There will be two e-Poster sessions taking place on each day of the congress, during the lunch breaks in Hall Q & Hall R.

Please refer to pages XVI for further information regarding e-Poster presentation instructions.

CME ACCREDITATION

CONGRESS ACCREDITATION

The 19th European Congress of Psychiatry is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists. The EACCME is an institution of the European Union of Medical Specialists (UEMS). To learn more about UEMS, please visit www.uems.net.

The 19th European Congress of Psychiatry is designated for a maximum of 18 hours of European external CME credits.

Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

EACCME credits are recognised by the American Medical Association towards the Physician's Recognition Award (PRA). To convert EACCME credit to AMA PRA category 1 credit, contact the AMA.

Attendance Tracking Report

Self scanning devices are placed in the registration area. You may approach the scanners and self-scan your badge in order to record your attendance. Only participants who have had recorded their attendance via the self-scanners will receive a report tracking their daily attendance at the Congress from the Secretariat after the Congress.

CME ACADEMIA COURSE ACCREDITATION

The CME Academia Courses are designated for 3 hours of European external CME credits.

Participants of the CME courses will be allowed to claim in total up to 3 hours of European external CME credits for participation in a course, and claim up to a total of 21 hours of European external CME credits for participation in the 19th European Congress of Psychiatry *including* a CME Academia Course.

CME Academia Courses will take place throughout the Congress. Please present your Course ticket at the entrance of the appropriate halls.

Participants of Courses are requested to complete the Evaluation Form at the conclusion of the Course and hand it to the hostess at the exit of the hall. Only upon submission of the Evaluation Form, the participant will receive the certificate of attendance for the course.

If you have participated in a CME Academia Course, please contact the registration desk for your certificate.

INFORMATION FOR PRESENTERS

All speakers presenting in sessions are kindly requested to submit their presentations to the Speakers' Ready Room at least 1 hour before the start of their session.

The Speakers' Ready Room is clearly marked at the Congress and is open at the following times:

Saturday, 12 March	11:00-18:00
Sunday, 13 March	07:00-19:30
Monday, 14 March	07:30-17:30
Tuesday, 15 March	07:30-17:30

If using a **PowerPoint** (or any other computer) presentation, please note you need to bring it on a CD, a DVD or on a "disk on key" Memory stick (using the USB port in the computer) and load it on one of the Congress' computers in the Speakers' Ready Room, at least 1 hour before the start of the session.

You may supply your own laptop computer as a **back-up**.

If combining video films with **PowerPoint**, please make sure to check it in the session hall where your lecture is taking place during a coffee or lunch break prior to your session, at least 30 minutes before the start of the session - **even after checking it in the Speakers' Ready Room**.

Please note that the Congress' computers in the session halls are supplied with Windows XP and Office 2007.

Important Note For Macintosh Users

In order to use MAC presentations on a PC compatible computer please note that you need to prepare it according to the instructions below, before bringing it to the Speakers' Ready Room:

1. Use a common font, such as Arial, Times New Roman, Verdana, etc. (Special fonts might be changed to a default font on a PowerPoint-based PC).
2. Insert pictures as JPG files (and not TIF, PNG or PICT - these images will not be visible on a PowerPoint based PC).
3. Use a common movie format, such as AVI, MPG and WMV
MOV files from QuickTime will not be visible on a PowerPoint-based PC).

You may use your own Macintosh laptop computer as a back-up. In

such a case please, confirm that it has a VGA socket for external signal and come to check it first in the Speakers' Ready Room as soon as you arrive and later on in the session hall where your lecture is taking place during the coffee or lunch break prior to your session, at least 30 minutes before the start of the session.

Please note that VHS Video projection, 35 mm' slide projection and Overhead projection (projection of transparencies) will not be available.

INFORMATION FOR POSTER PRESENTERS

Posters will be on display on three days: Sunday, 13 March, Monday, 14 March and Tuesday, 15 March with a daily rotation.

Your poster should be displayed as per the date and the poster board number in the Final programme (see pages 147-338).

Posters are to be mounted from 07:30 on your assigned day. Please remove your poster at the conclusion of sessions by 17:45. The Organising Committee will not be responsible for posters that are not removed on time.

Poster presenters are requested to be present at their designated poster board(s) to answer questions during breaks.

INFORMATION FOR E-POSTER PRESENTERS

Approximately 120 abstracts have been selected for an e-Poster Presentation. All abstracts chosen for e-Poster Presentations have been uploaded in a PDF format, prior to the Congress.

e-Posters will be presented in Hall R and Hall Q during lunch breaks from 12:45-14:15.

Abstracts selected for e-Poster Presentation will be presented both in a standard poster in the poster area, and as an e-Poster Presentation of the poster of about 4 minutes including 2-3 slides to present the poster.

If you have not submitted your e-Poster prior to the Congress via the online system, please bring it on a disc-on-key to the speaker ready room, 1 hour before the session starts.

ART, EXPRESSION, AND PSYCHOPATHOLOGY

EPA welcomes you to visit the Art Exhibition located in the Exhibition Area. The Art Exhibition will be open daily, during exhibition opening hours.

The Art of Heinz Müllerh in the Context of the EPA 2011

Art provides a space in which thinking and emotional experience can be liberated from the limits of reality. It allows a contact to worlds different from our own, within an artificial and therefore safe space. Hence more tolerance is possible towards art than towards what happens in the so-called real life.

Artists, being open towards their own inner world, often more openly accept extreme psychological states in themselves as well as in others and use them as a basis for inspiration. Kubin, Munch, Kirchner and others vividly filled their art with depression, anxiety and even psychotic chaos, which they had experienced themselves. Several other artists like Dubuffet welcomed the stylistic features found in psychiatric art and included them in their own works.

There are three ways in which art can help people with mental illness. First, involvement in art can provide a useful channel of communication for people who have difficulties in expressing their feelings and inner thoughts. Successful engagement in art may help people with mental illness regain self-confidence and self esteem. Communication through artistic endeavors might also facilitate the diagnostic and treatment process but this is not its primary goal.

Second, art can help in reducing stigma attached to mental illness. Making the general public, the authorities and health workers aware that people with mental illness can produce art work despite their illness can dispel prejudice and correct erroneous ideas about the uselessness of those affected by mental illness. The fact that appropriate treatment can help artists gain their full expressive power and productivity might also reduce the stigma currently attached to the therapies used in the treatment of mental illness.

Third, art can be a bridge between those who suffer from mental illness and are engaged in artistic work and those who are professionally active in the art world. Famous artists can be an invaluable ally in all efforts to improve the fate of people with mental illness - ranging from raising the priority societies give to care for mental illness to the development of broadly based program aiming at the prevention of mental illness.

In all these aspects the art of Heinz Müllerh is exemplary. The intensity of its expressed emotions offer a cathartic medium for him through which he interacts with the world and at the same time is able to achieve success and international recognition. Instead of being labeled a patient, Heinz Müllerh undoubtedly serves the world as an artist of astonishing creative potential.

Dr. Hans-Otto Thomashoff

ABOUT THE EUROPEAN PSYCHIATRIC ASSOCIATION

HISTORY

The European Psychiatric Association (EPA) was founded in October 1983 in the library of the Psychiatric Clinic of the University Hospitals of Strasbourg. The founding members were twelve French- and German-speaking University Psychiatrists: Professor Manfred Ackenheil † (Munich), Professor Peter Berner (Vienna), Professor Daniel Bobon † (Liège), Professor Harst Dilling (Lübeck), Professor Henri Dufour (Marseille), Professor Hans Heimann † (Tübingen), Professor Hans Hippus (Munich), Professor Michel Patris (Strasbourg), Professor Pierre Pichot (Paris), Professor Charles Pull (Luxembourg), Professor Werner Rein (Tübingen) and Professor Léonard Singer † (Strasbourg). The association was then given the name “Association of European Psychiatrists (AEP)”.

The objective of the AEP founding members was to establish an Association of French and German Psychiatrists, which would promote European Psychiatry in the fields of research, treatment and teaching, three axes considered to be unequivocally complementary.

Another objective was to establish an Association of psychiatrists that would act as a privileged mediator between practitioners, official councils and public authorities on matters relating to mental health policies. Besides, in the mind of its founding members, this Franco-German Association was to be the first step towards the creation of an Association gathering psychiatrists from all European countries.

In order to reach these goals, AEP gradually set up the organisation of the annual European Congress of Psychiatry, as well as other regular scientific meetings, the publication of a scientific international journal, the awarding of research grants and the creation of sections, as working groups corresponding to sub-disciplines in psychiatry.

Since its foundation and the inaugural Symposium held in May 1984, the number of AEP members was grown steadily and its extension to all countries - members of the European Council proceeded rapidly. As a consequence, AEP was granted in February 1989 with a consultant status for the European Council followed by a participatory status in 2003.

Strasbourg was selected as the seat of the Association. This choice derived from political, cultural and scientific reasons: Strasbourg is the seat of numerous international and European institutions, is situated in the centre of Europe, and is the university centre where the long - prevailing French and German psychiatric schools blended.

In 2008, the Extraordinary General Assembly brought about important changes to Association's statutes and future. A notable evolution applies to the new name of the organisation, called "European Psychiatric Association" (EPA) from then on. This change was well motivated by the wish to be in harmony with the name of its European and international partners, as also with the title of its European Congress.

Another major achievement has been inspired by the interest of the association in increasing its cooperation with National Psychiatric Associations. For this reason, EPA changed its Statutes in 2009 and offers now the possibility to National Psychiatric Associations to become Corporate members, while still preserving the possibility of Individual membership.

EPA is the most visible psychiatric association in Europe, basing its growth on the development of collaborative projects with other major psychiatric organisations, such as the European College of Neuro-Psychopharmacology (ECNP), the German Research Network on Schizophrenia (ECSR), the International Society of Neurobiology and Psychopharmacology, the European Brain Council (EBC), the European Federation of Psychiatric Trainees (EFPT) and the European Union of Medical Specialists (UEMS).

TODAY

The European Psychiatric Association is the largest international association of psychiatrists in Europe, with active members in as many as 75 countries including the international members. Its members include leading experts, but also national and international psychiatric associations, covering the interests of psychiatry and mental health in academia, research and practice.

Since 1983, EPA has dealt with psychiatry and its related disciplines and focuses on the improvement of care for the mentally ill as well as on the development of professional excellence.

MISSION

To improve psychiatry and mental health care throughout Europe.

ACTIVITIES

EPA accomplishes its mission through the following activities:

- Annual European Congress of Psychiatry
- European Psychiatry journal, published in 8 issues per year, plus supplements
- Academia, including CME courses, Summer School and other forms of training
- Early Career Psychiatrists Programme and other projects aiming to give young professionals a voice in the evolution of training, research and practice standards to enable them to take influence on their own future and career progress
- A range of grants, prizes and awards in psychiatric research and prevention
- 18 Sections, which collect, examine and disseminate information about their respective disciplines
- Practical guidance and position statements on topics of interest to the mental health community and beyond
- Initiatives on improving ethical standards of psychiatric care and practice
- Cooperation with National Psychiatric Associations through EPA Corporate membership
- Collaborative activities in partnership with international organisations working in the field of psychiatry and mental health care

ACADEMIA

The EPA Academia for Excellence in European Psychiatry is aimed at developing educational initiatives that will contribute to professional excellence of European Psychiatrists and their adoption of the highest ethical principles in all forms of psychiatric service, education and research.

The activities are defined and developed by the EPA Committee on Education and focus at present on proposing CME courses, organising a Summer School and other forms of training.

The EPA CME Courses Programme intends to increase knowledge, influence attitudes and provide professional and leadership skills to European Psychiatrists. The EPA CME courses are generally 180 minute-sessions designed to emphasise learning experiences that actively involve participants and include an opportunity for informal exchange with the faculty.

With a view to maintaining the highest quality of its CME courses, EPA initiated in 2010 a special Faculty workshop for the EPA course directors, allowing them to exchange good practices.

The EPA Academia Summer School will be organised for the first time on **6-10 July 2011 in Nice**, France, with a focus on **comorbidity between mental and physical disorders**. It aims at reinforcing the participants' ability to recognise comorbidity and will provide theoretical and practical lessons on how to manage patients with both physical and mental disorders. The programme is tailored for psychiatrists and other medical specialists interested in comorbidity between mental and physical disorders who are either trainees or within 2 years of completion of specialist training and residing in a country that form part of the WHO Europe region. **Up to 25 best applications** will be carefully selected by the Jury and will receive a Scholarship from EPA to attend the Summer School.

For more information, please visit the EPA website www.europsy.net.

SECTIONS

EPA has established sections that have their own steering committees. The 18 active EPA sections focus on the different subspecialties of psychiatry. Their mission is to collect and disseminate information, to establish working relations between individuals and with different national and international bodies working in the same field, and to achieve greater coordination. These Sections organise their own symposia under the aegis of EPA, and annual conferences in Europe.

List of EPA sections:

- Alcoholism and Drug Addiction
- Child and Adolescent Psychiatry
- Consultation Liaison Psychiatry and Psychosomatics
- Cultural Psychiatry
- Emergency Psychiatry
- Epidemiology and Social Psychiatry
- Forensic Psychiatry
- Geriatric Psychiatry
- Neuroimaging
- Personality and Personality Disorders
- Philosophy and Psychiatry
- Prevention of Mental Disorders
- Psychopathology
- Psychopharmacology
- Psychotherapy
- Schizophrenia
- Suicidology and Suicide Prevention
- Women, Gender and Mental Health

PRIZES and AWARDS

One of the European Psychiatric Association's missions is to accompany Early Career Psychiatrists in their professional development. For this, the association proposes a large panel of grants and prizes. The list of prize winners for this the 19th European Congress of Psychiatry can be found on pages XVII z of this programme book. Application for prizes for the next, 20th European Congress of Psychiatry will open in due course.

MEMBERSHIP

To become a member of EPA, you are invited to submit your application to the Secretary General. A standard application form can be completed on the EPA website www.europsy.net.

By becoming an EPA member, you will

Penetrate the network of European scientists and researchers in Psychiatry through taking part in the annual General Assembly and Membership Round Table, joining EPA scientific Sections and receiving regular updates on EPA activities and projects

Keep yourself informed about the latest scientific research and treatments through getting free online subscription to the European Psychiatry Journal, attending the annual European Congress of Psychiatry with discounted registration fees, and participating in Continuing Medical Education (CME) courses at preferential prices.

Ciprallex - the power to tackle depression at its core

Leaving no one behind

Presentation: "Ciprallex" Tablets containing 5, 10, 15 or 20 mg escitalopram (as oxalate). **Indications:** Major depression. Generalised anxiety disorder. Panic disorder. Social anxiety disorder. Obsessive compulsive disorder. **Dosage:** Usual dose is 10 mg daily. Maximum dose 20 mg daily. In elderly (>65 years), in panic disorder patients and in patients with reduced hepatic function an initial dose of 5 mg daily is recommended. Caution in patients with severely reduced renal function. Not recommended in children and

adolescents (<18 years). When stopping treatment the dose should be gradually reduced over a period of one or two weeks. **Contraindications:** Hypersensitivity to escitalopram. Concomitant treatment with MAOIs. **Pregnancy and lactation:** Careful consideration prior to use in pregnant women. Breast-feeding women should not be treated. **Precautions:** The special warnings and precautions which apply to the class of SSRIs. **Drug interactions:** MAOIs, serotonergic drugs, drugs lowering the seizure threshold,

lithium, tryptophan, St. John's Wort, anticoagulants, drugs metabolised mainly by enzymes CYP 2D6 or 2C19. **Adverse events:** Most frequent during the first or second week, very common nausea, less frequent is adverse events comprising to the SSRI class. **Overdosage:** Doses between 400 mg and 800 mg of escitalopram alone have been taken without any severe symptoms. Consult full prescribing information before prescribing. H. Lundbeck A/S, Copenhagen, Denmark, January 2010
